

News Release

Omega’s Now Shipping the new AC-2.0 2-Gallon 150 PSI “Air-Tank/Compressor” Unit

DOUGLASVILLE, GEORGIA – June 5, 2017– Omega Research & Development Technologies, Inc. is now shipping the AC-2.0 Air-Tank & Compressor Combo unit.

The AC-2.0 is the big brother to the AC-1.5 and gives you 30 more PSI and an additional ½ gallon of air capacity to give your train horns that added boost.

So if you need more BLOW, take home 2-Gallons of it.

About Omega:

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
