

## **EYELOCK ANNOUNCES NEW PARTNERSHIP WITH PSA SECURITY NETWORK**

**NEW YORK, NY – Date** – EyeLock LLC, a market leader of iris-based identity authentication solutions, today announced it has entered into a partnership with PSA Security Network, the world’s largest electronic security cooperative. Through this partnership, PSA integrators will offer EyeLock’s market leading iris biometrics products to their vast customer base.

EyeLock’s technology provides an unprecedented level of convenience and security with unmatched biometric accuracy, making it the most proven way to authenticate identity aside from DNA. EyeLock’s proprietary iris authentication technology looks at more than 240 unique iris characteristics, and is one of the only companies in the world to utilize dual-eye authentication.

“This partnership with PSA is an important part of our global distribution strategy,” said Anthony Antolino, Chief Marketing and Business Development Officer at EyeLock. “Iris access control is fast becoming a critical component of enterprise security and EyeLock’s suite of products offers a market leading, cost-effective solution to PSA’s wide reaching network of integrators and end users.”

PSA Security Network is the world’s largest electronic security cooperative, owned by the most progressive security integrators throughout North America. These leading security systems integrators are responsible for over \$2 billion annually in security, fire, and life safety installations.

“PSA is thrilled to be working with EyeLock,” said Craig Patterson, Director of Vendor Management for PSA Security Network. “EyeLock’s solutions are user friendly, interoperable with major access control platforms, and are priced right. EyeLock is going to create a significant competitive advantage for our members and their businesses.”

### **About EyeLock**

[EyeLock LLC](#) is an acknowledged leader in advanced iris authentication for the Internet of Things (IoT), providing the highest level of security with EyeLock ID™ technology. Iris authentication is highly secure because no two irises are alike and the iris is the most accurate human identifier other than DNA. The company’s significant IP portfolio, including more than 75 patents and patents pending, and proprietary technology enables the convenient and secure authentication of individuals across physical and logical environments. EyeLock’s solutions have been integrated and embedded across consumer and enterprise products and platforms, eliminating the need for PINs and passwords. Corporations across the Fortune 500 recognize the level of security EyeLock provides due in part to its extremely low false acceptance rate, ease of use, and scalability. As a sponsor member of the [Fast Identity Online Alliance](#) (FIDO), a non-profit organization dedicated to creating a safer and more secure digital presence for consumers, EyeLock is dedicated to advancing digital privacy and next generation security.
